METHOD FOR DETERMINING CHARGES IN REAL TIME FOR VALUE-ADDED SERVICES IN A TELECOMMUNICATION NETWORK Inventor: Gerrit Vöhringer

Docket No.: 740-74

1/1

selection of a value-added service by dialing an associated destination number 0900 x₁...x₉

ţ

interception of destination number 0900 x₁...x₉ in an intelligent network element of the telecommunication network

1

conversion of this destination number into a special access number $0121100 x_1...x_9$ for the value-added service

ŧ

establishment of a connection between the intelligent network element and the value-added service provider using the access number

1

transmission of the applicable rate for the use of the requested value-added service from the value-added service provider to the intelligent network element in the form of a new destination number (01211 y₁y₂ x_{1...x₉) for the requested value-added service}

t

evaluation of the new destination number in the intelligent network element

ŧ

establishment of a connection between the caller and the value-added service using the new destination number (01211 $y_1y_2 x_1...x_9$) at the new rate
